Page 1 • © 2026 Arnel Maghinay

Table of Contents

1. Introduction

GradeFlow is a complete, offline grading and records system built for teachers. It lets you design any grading scheme you like, enter grades in a familiar spreadsheet-style grid, generate professional PDF reports, and receive offline intervention analysis that highlights which students need help and where to focus it.

The system is built with **PHP** for the web interface, database, and PDF reports, and **Python** for local statistical analysis. It requires **no internet connection, no API keys, and is free to use.**

1.1 What GradeFlow Does

- **Flexible criteria & weights** — add any number of grading criteria per term (Quizzes, Projects, Exams, Recitation, and so on), each with its own weight and a set of activities that each have their own perfect score.
- **Spreadsheet gradebook** — click any cell to edit, navigate with the arrow keys, and paste a whole block copied from Excel or Google Sheets. Term grades update live as you type.
- **Transmutation** — raw scores are automatically converted to grade equivalents using your school's grade scale (configurable cut-off and zero-equivalent), or you can switch to plain percentage grading.
- **PDF reports** — one click generates a per-term report with the full criterion breakdown, a final-grade report with pass/fail and a class summary, or an attendance report.
- **Intervention analysis** — for each student a local engine scores their intervention priority, detects grade trends, finds the weak areas that hurt the grade most (weighted by impact), flags missing work, and lists concrete prioritized actions.
- **Attendance tracking** — record Present / Absent / Late per session and view attendance rates per student.
- **Multiple roles** — Teachers manage their own classes, Program Chairs oversee faculty in their department, and Administrators manage the whole school.

1.2 The Three User Roles

GradeFlow has three roles, all sharing the same login page. The role determines which dashboard you see after signing in.

Role	What they can do
Teacher	Create classes, set up criteria and weights, add students, enter grades, take attendance, run analysis, and generate reports for their own subjects.
Program Chair	View (read-only) the classes and records of all faculty in their assigned college and department. Cannot edit grades.
Administrator	Browse all teachers and classes, approve new teacher accounts, reset passwords, generate reports for anyone, manage colleges/departments, configure school branding, and create backups.

2. Installation & Setup

GradeFlow is designed to run on a standard XAMPP (Windows) stack — Apache + MySQL/MariaDB — with Python installed for the analysis engine. Setup takes about five minutes.

2.1 Requirements

- **XAMPP** (Apache + MySQL/MariaDB) — start both from the XAMPP Control Panel.
- **Python 3** — during installation, tick “Add Python to PATH”. Used only for offline analysis.
- **A modern web browser** (Chrome, Edge, Firefox).

2.2 Installation Steps

1. Copy the **gradesystem** folder into your XAMPP htdocs directory, e.g. C:\xampp\htdocs\gradesystem.
2. Open **config/config.php**. The defaults already match a standard XAMPP install (host 127.0.0.1, user root, empty password). If Python is not on your PATH, set the full path with the PYTHON_BIN setting.
3. In your browser go to **http://localhost/gradesystem/install.php**. The installer creates the database and tables and checks your environment.
4. When every check shows a green tick, your installation is ready.

Figure 2.1 — The installer verifies PHP, the database driver, the database connection, and runs all migrations. Green ticks mean you are ready to go.

2.3 Creating the First Administrator

The installer page also lets you create the very first Administrator account when none exists yet. After that first admin is created, additional admin accounts can only be made from within the Admin Settings panel.

Tip — Resetting everything

To start completely fresh, drop the **grade-flow** database in phpMyAdmin and re-run `install.php`. Every migration step is safe to run more than once.

3. Signing In & Accounts

3.1 The Login Screen

All three roles sign in from the same login page. After authentication, GradeFlow automatically sends you to the right place: teachers to their class dashboard, chairs to the faculty overview, and admins to the admin panel.

The screenshot shows the login interface for the Northgate Institute of Technology GradeFlow Grading & Records System. At the top, it says "Northgate Institute of Technology" and "GradeFlow Grading & Records System". Below this, there's a note: "Teacher & Admin use this same login". The login form includes fields for "Email Address" (with the placeholder "your@email.com") and "Password" (masked with dots). A "Sign In" button is positioned below the password field. Underneath the login form, there are two columns of links: "Teachers" (Go to their class dashboard to manage grades) and "Admins" (Go to the admin panel to view all teachers' records). At the bottom, there are links for "New teacher? Create account" and "Setup / Install". A small copyright notice at the very bottom reads: "Copyright © 2026 Arnel Maghinay. All rights reserved."

Figure 3.1 — The shared login screen. The school name and logo shown here are configurable in Settings.

3.2 Registering as a Teacher

New teachers create their own account from the registration page. A teacher account is created in a pending state and must be approved by an administrator before the teacher can log in.

The screenshot shows the "Create Teacher Account" registration form for the GradeFlow — Grading & Records System. At the top, it says "Create Teacher Account" and "GradeFlow — Grading & Records System". Below this, there's a blue box with the text: "This creates a Teacher account. Teachers can create classes, enter grades, and generate reports for their own subjects." The form includes fields for "Full Name" (with the placeholder "e.g. Prof. Maria Santos"), "Email Address" (with the placeholder "you@school.edu"), "Password (min 6 characters)" (masked with dots), and "Confirm Password" (masked with dots). A "Create Teacher Account" button is positioned below the password fields. At the bottom, there are links for "← Back to login" and "Create an Admin account instead". A small copyright notice at the very bottom reads: "Copyright © 2026 Arnel Maghinay. All rights reserved."

Figure 3.2 — Teacher self-registration. After submitting, the account waits for admin approval.

Note — Account approval

Administrators and Program Chairs are pre-approved. Teachers always require an administrator to approve them before their first login. Until then, attempting to log in shows a “pending approval” message.

4. The Class Dashboard (Teacher)

After a teacher signs in, the dashboard lists all of their classes. Each class is shown as a card with its subject, code, section, terms, school year, semester, and student count.

Figure 4.1 — A teacher's class dashboard with two active classes.

4.1 Class Card Actions

Button	What it does
Open Gradebook	Opens the spreadsheet gradebook for that class — where you do most of your work.
Edit	Changes the class details (name, code, section, terms, passing grade, transmutation settings).
Duplicate	Copies the class, including its criteria and weights, as a starting point for a new section.
Archive	Moves the class to the Archived page to keep your active list tidy. Archived classes can be restored.
Delete	Permanently removes the class and all of its data. Requires your password to confirm.

You can also drag a card to reorder your classes, and the **+ New Class** button (top right) opens the class creation form.

4.2 Creating a New Class

The New Class form collects the subject details, the grading terms, the passing grade, and the transmutation settings.

Figure 4.2 — The New Class dialog.

Key fields:

- **Terms** — a comma-separated list of grading periods, for example Prelim, Midterm, Finals. You can use any names, or just a single term such as “Semester”.
- **Passing Grade** — the minimum final grade a student needs to pass (default 75).
- **Transmute?** — when set to Yes, raw scores are converted to grade equivalents using the Cut Off and Zero Equivalent values. Set to No for plain percentage grading.
- **Cut Off** — the raw percentage that maps to a grade of 75.
- **Zero Equivalent** — the grade given for a raw score of 0.

5. The Gradebook

The gradebook is the heart of GradeFlow. It is a spreadsheet-style grid with a tab for each term plus tabs for Final Grades and Attendance. Each term shows your criteria across the top (with their weights), and the individual activities under each criterion.

Each activity shows raw (you type) and its equivalent (computed). Scores are capped at each activity's perfect score. AVG = mean of equivalents; WS = AVG × weight.

Copyright © 2026 Arnel Maghinay. All rights reserved.

Figure 5.1 — The gradebook on the Prelim term. Criteria (Quizzes, Term Exam, Class Participation, Projects) each show their weight; each activity shows the raw score you type and its computed equivalent.

5.1 Reading the Grid

For every activity there are two columns:

- **Raw** — the score you type. Scores are automatically capped at the activity's perfect score.
- **Equivalent** — the transmuted grade for that raw score, computed for you (shown in green).

At the end of each criterion you will also see:

- **AVG** — the mean of the equivalents within that criterion.
- **WS** — the weighted score, equal to AVG multiplied by the criterion's weight.

The far-right column shows the computed **term grade** for each student, which is the sum of the weighted scores. A running total at the top shows how many students passed and failed.

5.2 Entering Grades

1. Click any cell to start editing, and use the arrow keys to move between cells.

2. Type a raw score; the equivalent, AVG, WS, and term grade all update live.
3. To enter many scores at once, copy a block from Excel or Google Sheets and **paste it directly onto the grid**.
4. Click **Save changes** to store your edits.

How grades are computed

Term grade = the sum, over all criteria, of (criterion AVG × criterion weight). If a term is only partly graded, the running grade reflects the weight entered so far so it stays meaningful mid-term.

Final grade = the weighted average of the term grades using your term weights (an equal split is used if you don't set them).

A student passes if their final grade is greater than or equal to the class passing grade.

6. Setting Up Criteria & Activities

Before entering grades, set up your grading scheme. From the gradebook, click **Setup Criteria & Activities**. For each term you build the criteria (such as Quizzes or Term Exam), give each a weight, and add the individual activities under it — each activity carries its own perfect score.

Figure 6.1 — Criteria & Activities setup for the Prelim term. Each criterion has a weight; each activity (Q1, Q2, ...) has its own perfect score.

6.1 Building Your Scheme

- **Add criterion** — creates a new component (e.g. “Projects”) with a weight in percent.
- **Add activity** — adds a column under a criterion (e.g. “Q1”) and lets you set its perfect score.
- **Duplicate** — copies a criterion, which is handy when the same component repeats across terms.
- **Term Weights** — at the bottom of the dialog you set how much each term counts toward the final grade.

Important — Weights must total 100%

The criteria weights within a single term should add up to 100%, and the term weights (Prelim, Midterm, Finals) should also add up to 100%. GradeFlow validates these totals for you.

7. Managing Students

Click **+ Students** in the gradebook to open the Student List. Here you can review existing students, edit or remove them, and add new ones in bulk.

Student List [Close]

Student No.	Last Name	First Name	Email	Edit	Remove
2025-001	Abad	Liam	—		
2025-002	Bautista	Sofia	—

2025-012	Mendoza	Isabella	—		

[+ Add New Students](#)

Figure 7.1 — The Student List, showing student number, last name, first name, and email, with edit and remove controls.

7.1 Adding Students in Bulk

Expand **Add New Students** and paste a list — one student per line. Each line can be either:

- **LastName, FirstName**
- **StudentNo, LastName, FirstName** (when you want to record student numbers too)

8. The Final Grades Tab

The **Final Grades** tab combines all of your terms into one view. It shows each student's grade per term, the computed Final Grade, a Pass/Fail remark, and an Analyze button to run the intervention analysis for that student.

The screenshot shows the 'Final Grades' tab in the GradeFlow interface. The header includes the Northgate Institute of Technology logo and navigation links like 'My Classes', 'Archived', 'Settings', 'Prof. Maria Santos', and 'Sign out'. The course details are 'Data Structures & Algorithms', 'Course Code: CS201', 'Course & Section: BSIT-2A', 'Academic Year: 2025-2026', and 'Semester: 1st Semester'. The 'Final Grades' tab is selected, showing a table of student grades. The table has columns for Student, Prelim, Midterm, Finals, FINAL GRADE, Remarks, and AI Insight. All students listed have passed, with remarks 'Passed' and 'Analyze' buttons. A summary bar at the top of the table shows 'Total Students: 12', 'Passed: 12', and 'Failed: 0'. A footer note explains that scores are capped and provides the formula for the weighted average: $WS = AVG \times \text{weight}$.

Student	Prelim	Midterm	Finals	FINAL GRADE	Remarks	AI Insight
Abad, Liam	78	77	75	77	Passed	Analyze
Bautista, Sofia	80	77	77	78	Passed	Analyze
Castro, Noah	80	80	75	78	Passed	Analyze
Dela Cruz, Emma	82	82	79	81	Passed	Analyze
Espino, Lucas	85	84	84	84	Passed	Analyze
Fernandez, Mia	86	85	86	86	Passed	Analyze
Garcia, Ethan	89	87	88	88	Passed	Analyze
Hidalgo, Olivia	91	90	89	90	Passed	Analyze
Ignacio, Daniel	94	91	92	92	Passed	Analyze
Jimenez, Ava	96	96	93	95	Passed	Analyze
Lim, Gabriel	97	97	95	96	Passed	Analyze
Mendoza, Isabella	97	99	97	98	Passed	Analyze

Each activity shows raw (you type) and its equivalent (computed). Scores are capped at each activity's perfect score. AVG = mean of equivalents; WS = AVG × weight.

Figure 8.1 — Final Grades, with per-term grades, the weighted Final Grade, pass/fail remarks, and per-student Analyze buttons.

Passing students are highlighted in green and failing students in red, so you can see class standing at a glance. The header keeps a live count of how many students passed and failed.

9. Attendance Tracking

The **Attendance** tab lets you record attendance per class meeting. Pick a term, add sessions (one per meeting), and mark each student Present, Absent, or Late. The summary columns and attendance Rate update automatically.

Figure 9.1 — Attendance for the Prelim term across five recorded sessions. Cells are colour-coded: P (present, green), L (late, amber), A (absent, red).

9.1 Taking Attendance

1. Choose the term, then click **+ Add Session** to create a meeting (with a label and date).
2. Click a student's cell to cycle their status: Present → Absent → Late. Each change saves automatically.
3. The **Rate** column shows each student's attendance percentage, counting a Late as half of a Present.

10. Intervention Analysis

GradeFlow includes an offline analysis engine that turns grades into guidance. Click **Analyze** on any student (or **Analyze All Students** for the whole class) to open the report. Everything runs locally in Python — nothing is sent online.

Figure 10.1 — A single-student intervention report.

10.1 What the Report Shows

- **Intervention priority** — a score and level (low / medium / high) summarising how urgently the student needs attention, along with a short plain-language reason.
- **Trend** — whether the student's grades are rising, steady, or declining across terms.
- **Performance areas by grade impact** — the criteria that most affect the grade, each shown with its average and weight as a progress bar, so the highest-impact weak spots stand out.
- **What you can do to improve** — a prioritized, numbered list of concrete actions tailored to that student.

Decision-support, not automation

The analysis is meant to support your judgement, not replace it. It suggests where to focus; you decide what to do.

11. PDF Reports

The **PDF Report** button in the gradebook generates polished, printable reports. There are three kinds: a term report, a final-grade report, and an attendance report. All carry your school name, address, and logo from Settings.

11.1 Final Grade Report

Lists every student with their grade per term, the computed Final Grade, and a Pass/Fail remark, followed by a class summary (number graded, class average, passing rate) and a signature block.

Figure 11.3 — A generated Attendance Report.

12. Settings & Personalisation

The **Settings** page (top bar) is where you manage your profile and customise how GradeFlow looks — both on screen and in your PDF reports. Colour and font choices are **personal**: changing them only affects what you see, so each teacher keeps their own theme.

12.1 Profile & Web Theme

My Profile lets you update your name (which appears on your reports), email, college/department assignment, and password. The Web Theme section lets you choose a font family and fine-tune every colour in the interface, including the gradebook table, with a live preview.

The screenshot displays the 'Settings' page for a user named Prof. Maria Santos. The page is divided into two main sections: 'My Profile' and 'Web Theme'.

My Profile Section:

- Complete Name:** Prof. Maria Santos
- Email Address:** demo@grade-flow.local
- College Assigned:** College of Computer Studies
- Department / Program Assigned:** Information Technology
- Change Password:** Includes fields for Current Password, New Password (Min 6 characters), and Confirm New Password. A 'Save Profile' button is at the bottom right.

Web Theme Section:

- Font Family:** A grid of 15 font options is shown, including Outfit (Modern), Inter (Clean), Lato (Friendly), Poppins (Geometric), Nunito (Soft), Raleway (Elegant), Montserrat (Bold), Open Sans (Versatile), Source Sans (Readable), Merriweather (Classic), Playfair (Elegant), Roboto (Google style), Rethink Slab (Slab), PT Sans (Humanist), Georgia (System), Courier (Monospace), and System UI (Native OS font).
- Navigation Bar:** Includes color pickers for Nav Background (top bar), Nav Text & Links (on the bar), and Accent Color (buttons, highlights).
- Page & Content:** Includes color pickers for Body Text (main content), Muted / Secondary Text, and Link Color.
- Surfaces & Borders:** Includes color pickers for Page Background, Card Background, and Border / Line Color.
- Gradebook Table Colors:** A section for customizing colors in the Term Grade and Final Grade tables, including Column Headers (Criterion BG, Criterion Text, Activity BG, Activity Text, AVG/WS Header BG, AVG/WS Header Text) and Data Rows (Odd Row BG, Odd Row Text, Even Row BG, Even Row Text, Computed Cell BG).

Figure 12.1 — Profile details and the Web Theme controls (font family and interface colours).

12.2 PDF Report Appearance

The PDF Report Appearance section controls the look of your generated reports: title and body fonts, paper sizes for term and final reports, and per-area colours (headers, table rows, special cells, signature block, and the intervention report). Quick theme presets apply a coordinated look in one click.

The interface is divided into several sections for configuring the PDF report appearance:

- Global Colors:** Three color swatches with hex codes: 0,0,0 (black), 60,60,80 (dark blue), and 201,123,31 (gold).
- TABLE HEADERS:**
 - Header Background: 29,36,51
 - Header Text: 245,240,230
 - Sub-header Row: 45,65,45
 - Sub-header Text: 245,240,230
- DATA ROWS:**
 - Data Text: 0,0,0
 - Odd Row Background: 255,255,255
 - Even Row Background: 248,246,240
 - Border / Lines: 200,193,180
- SPECIAL CELLS:**
 - Equiv Cell Fill: 216,236,223
 - Equiv Cell Text: 30,100,60
 - WS Cell Fill: 240,217,181
 - WS Cell Text: 100,70,10
 - Term Grade Fill: 240,217,181
 - Term Grade Text: 80,50,10
 - Passed Cell Fill: 47,125,84
 - Passed Cell Text: 255,255,255
 - Failed Cell Fill: 178,59,59
 - Failed Cell Text: 255,255,255
 - INC / No Grade Fill: 220,220,220
 - INC / No Grade Text: 80,80,80
- FINAL GRADE REPORT — GRADE COLUMNS:**
 - Term Col Pass Fill: 255,255,255
 - Term Col Pass Text: 0,0,0
 - Final Grade Pass Fill: 255,255,255
 - Final Grade Pass Text: 0,0,0
- FOOTER & SIGNATURE:**
 - Footer Text: 160,160,160
 - Signature Text: 0,0,0
 - Page Background: 255,255,255
- Live Preview:** Three small report thumbnails showing Term Grade Report, Final Grade Report, and AI Intervention Report.
- AI INTERVENTION REPORT APPEARANCE:**
 - Header Bar:
 - Header BG: 29,36,51
 - School Name Text: 0,0,0
 - Address / Subtitle: 0,0,0
 - Report Title Text: 0,0,0
 - Accent Line: 201,123,31
 - Body & Info:
 - Body Text: 0,0,0
 - Info Row Text: 0,0,0
 - Report Title Text: 0,0,0
 - Statistics Box:
 - Stats Box Fill: 245,243,237
 - Stats Value Text: 0,0,0
 - Stats Label Text: 0,0,0
 - Section Headers & Footer:
 - Section Header BG: 29,36,51
 - Section Header Text: 0,0,0
 - Footer Text: 120,120,120
 - Page Background: 255,255,255
- Quick Theme Presets:**
 - Dark Themes:**
 - Classic Dark:** Default professional look — dark navy header
 - Deep Forest:** Rich dark green — great for science subjects
 - Midnight Blue:** Deep blue header with gold accent
 - Charcoal:** Neutral dark grey — versatile and clean
 - Maroon & Gold:** School colors — formal and traditional
 - Light Themes:** Light headers — saves ink, easy on screen preview
 - Clean White
 - Warm Beige
 - Sky Blue
 - Page Green
 - Light Purple
 - Warm Coral

Figure 12.2 — PDF report appearance controls with live previews and theme presets.

12.3 School Branding (Administrator)

Administrators additionally control the school-wide branding shown to everyone: the school name, address, logo, and the system subtitle that appears on the login screen and across reports.

13. The Administrator Panel

Administrators see the Admin Dashboard after signing in. It lists every teacher as a card showing their class and student counts and their approval status, with tools to manage them.

Figure 13.1 — The Admin Dashboard with teacher cards, search, and a Backup option in the top bar.

13.1 Administrator Tasks

- **Approve teachers** — newly registered teachers appear here and must be approved before they can log in.
- **View Reports** — open any teacher's classes (read-only) and generate reports on their behalf.
- **Reset PW** — reset a teacher's password if they are locked out.
- **Search** — quickly find a teacher by name or email.
- **Backup** — create a backup of the system data from the top bar.
- **Settings** — manage school branding, colleges and departments, and create additional admin accounts.

14. The Program Chair View

A Program Chair oversees the faculty in one or more assigned college / department pairs. After signing in they see the Faculty Overview: a card for each supervised teacher with their college, department, status, and class count.

Figure 14.1 — The Program Chair's Faculty Overview, scoped to their assigned departments.

Clicking **View** on a teacher opens their classes in read-only mode, so the chair can review grades, attendance, and analysis, and generate reports — but cannot change any grades. This keeps a clear separation between oversight and the teacher's ownership of their own records.

15. Quick Reference

15.1 Typical Teacher Workflow

1. **Create a class** and set its terms and passing grade (Dashboard → New Class).
2. **Set up criteria & activities** with weights that total 100%, and set the term weights (Gradebook → Setup Criteria & Activities).
3. **Add students** by pasting a list (Gradebook → + Students).
4. **Enter grades** by typing or pasting from Excel, then Save changes.
5. **Take attendance** per session on the Attendance tab.
6. **Review Final Grades** and run Analyze on students who need attention.
7. **Generate PDF reports** for the term, the finals, or attendance.

15.2 Key Terms

Term	Meaning
Criterion	A grading component within a term (e.g. Quizzes), carrying a weight.
Activity	An individual graded item under a criterion (e.g. Q1), with its own perfect score.
Raw score	The score you type for an activity, capped at its perfect score.
Equivalent	The transmuted grade computed from a raw score.
AVG	The mean of the equivalents within a criterion.
WS	Weighted score = AVG × the criterion's weight.
Transmutation	Converting raw scores to grade equivalents using the cut-off and zero-equivalent.
Term weight	How much a term (e.g. Prelim) contributes to the final grade.

Need more help?

GradeFlow runs entirely offline and stores everything in your local database. To reset the system, drop the gradeflow database and re-run install.php. Tweak the criteria, weights, colours, and reports freely to fit how you teach.
